**Recommendation letter for Mr. Łukasz Bartłomiej Gałęcki**

27 March 2025

danqua

I am pleased to recommend Mr. Łukasz Gałęcki for a position in your institution's "The ORIGIN Programme." The subject matter that Mr. Gałęcki would like to pursue is of paramount importance in the modern manufacturing industry. I will be delighted to witness him excelling in this field and boosting his personal and professional development.

I currently supervise Mr. Gałęcki on his MSc final project "XCT examination of welds in metal parts," where he is investigating the applicability of X-ray Computed Tomography (XCT) in assessing weld quality in both traditional and additively manufactured metal parts. Concurrently, he is a teaching assistant in my MSc course on Manufacturing Metrology (DTU 41734—Geometrical Metrology and Machine Testing). I have also taught Mr. Gałęcki in the same MSc course during the past academic year. Mr. Gałęcki enthusiastically participated in lectures and laboratory activities, learning geometrical metrology methods and using noteworthy instruments like coordinate measuring machines (CMMs) and optical microscopes. He successfully carried out tolerance verification tasks and analyses of functional surfaces of manufactured metal components. Subsequently, Mr. Gałęcki completed a special course under my supervision, conducting a metrological comparison of CMM and a structured-light 3D scanner. Thus, not only did Mr. Gałęcki develop significant metrological skills, but I have also observed his work efficiency, critical thinking abilities, independence, tirelessness towards his goals, and carefulness regarding various tasks.

Mr. Gałęcki has a sensible and practical nature and respects others while complying with rules and regulations. His independent or group work on research activities and studies has been inspired by enthusiasm and curiosity and stimulated by new academic challenges. Hectic timelines, harsh work conditions, and dealing with various people along the way are factors that he can undertake with ease.

REG-no. DK 30 06 09 46

Mr. Galecki has improved consistently. He is a deserving candidate for an opportunity to join The ORIGIN Programme. I would be delighted if my recommendation helps him obtain admission.

If you have any queries regarding Mr. Galecki's candidature, please feel free to reach me at the indicated phone number or email address.

**Best regards,**

A handwritten signature in black ink, which appears to read 'Danilo Quagliotti', is written below the text 'Best regards,'.
